— —

Batching

1. When you want to process 1000s of requests and you don't need result instantly.
2. You upload relevant file/prompt and you start batch job.
3. You poll, until it's done
4. Download all the results at once.

Text tokens

Per 1M tokens · Batch API price

Input	Cached input	Output
$0.05	$0.005	$0.40
